

WHERE ARE THE
BUTTERFLY
GARDENS?

An international organization of amateurs and
professionals dedicated to the study of
Butterflies and Moths.

© The Lepidopterists' Society
1200 John Street
Manhattan Beach, CA 90266-2608

The list of butterfly gardens has been put together for travelers who enjoy butterfly watching, gardening, photography, and as a resource for people who are planning a butterfly garden. I was frequently asked if there were other gardens in a specific area where information on nectar and host plants and local butterflies could be shared.

In some states, schools had planted butterfly gardens with great success. In one area of Florida there are forty schools enjoying their butterfly gardening. They were not included in this list as most of them are inaccessible to the public.

Many of the Nature and Environmental Centers have very small butterfly gardens. Telephone numbers have been included, so do call these places before visiting as there may have been some changes, including deer having eaten everything! Also, so much depends on the focus of the teacher/naturalist at each place. But it is worth remembering they also offer many other things besides butterfly gardening, such as nature trails and bird watching, etc.

After a year collecting butterfly garden information, I feel that I have new friends throughout North America and I wish I could spend the next year travelling around the country! Many, many thanks to everyone who responded to my letters.
