PROPOSED AMENDMENT TO THE CONSTITUTION

As a step toward getting the Society declared a nonprofit organization, the clause printed below will have to be inserted in the Constitution. Notice is hereby given (inaccordance with Article 12, Section 1) that this proposed Constitutional Amendment will be sent to the members with the ballots in November. Members in attendance at the annual meeting in Corvallis discussed the difficulty of selecting a depository. It was generally agreed that one eastern and one western organization, qualified under the Internal Revenue code, should be selected and the two indicated in the proposed amendment were chosen.

Proposed Amendment: Article XIII. Upon final dissolution or liquidation of this Society, all of its properties and assets remaining after payment of all its outstanding liabilities shall be transferred, assigned and paid over as follows: The American Museum of Natural History, Central Park West at 79th St., New York, N. Y., 10024, and the California Academy of Sciences, Golden Gate Park, San Francisco, Cal., 94118.

If any of the named organizations no longer qualify for exemptions under Section 501 (c) (3) of the Internal Revenue Code, or are not in existence, or unable or unwilling to accept such properties and assets, such properties and assets shall be distributed to such organization or organizations organized and operated exclusively for charitable or educational purposes as shall at the time qualify as an organization or organizations exempt under Section 501 (c) (3) of the Internal Revenue Code of 1954 (or corresponding provision of any future United States Internal Revenue Law), as the Executive Council shall determine.

WANTED FOR RESEARCH PURPOSES: Living specimens (Chrysalids or adults) of Battus philenor L. Damaged living adult specimens are acceptable. I will be accumulating these through June, 1968. Please state number and price. Austin P. Platt, Department of Biology, Wesleyan University, Middletown, Conn., 06457.

RESEARCH NOTICE

Arizona collectors - transient or resident. I need your help. Colias philodice has recently become established in most of the State. Data on its present range, particularly west of Gila Bend, and its earliest year of appearance in the State will aid in documenting the southwesterly spread of this species and the evaluation of data on the progress of reproductive isolation between C. eurytheme and C. philodice. Orley R. Taylor, Jr., Dept of Zoology and Entomology, Univ. of Connecticut, Storrs, Conn., 06268.

NEWS NOTES

News has been received from Malcolm Barcant, our only member in Trinidad, British Caribbean, of his highly successful crossing of Morpho peleides insularis with M. achillaena from Brazil, after several years of informative and massive breeding. The outcome from this cross has been a stable F1 of 46 adults and a diverging mendellian F2 of 49 adults. The F2 emergence was completed in June 1967 and a paper on the conspecificity of these two hitherto considered "independent species" is now being prepared and will be published in the Journal. It is considered that the work is a step towards a revision of the Morphidae and an encouragement to further studies of this remarkable family in which the various forms of the three groups - peleides, achilles and achillaena are likely to show themselves fit subjects for experiments in conspecificity. Mr. Barcant was ably supported by valuable help in material and information from Mr. Keith Brown, Jr., Rio de Janeiro, Brazil.

Mr. Julian P. Donahue, Michigan State University, reports that Senorita Dna. Mariana de Ibarra of the Spanish governmental Instituto Jose de Acosta, wishes to exchange Lepidoptera with collectors in the United States. Her address is Calle de Canals 3, Palma de Mallorca, SPAIN.
