Fort Colchester Aug 30, 1870

Prof. O.C. Marsh

Dear Sir: Your letter of the 25th inst is retd. The bone referred to was carried by the party who found it to the Editor of the Omaha Republican where it now is. I will make an effort to secure it for your benefit and that of science. I have no doubt the specimen would have scientific interest. It has been the purpose of our citizens to make an effort to recover more of the skeleton of possible, but as yet nothing has been done.

Please accept my thanks for your interesting paper and documents accompanying your letter.

Yours truly,

Evan Leach
