5 Jan. 1879

Dear Prof. Marsh,

I write to ask whether you would care to have from the Museum a set of Cane Wines.

Please come for Reindeer, Hyenas, Bears, Reindeer, etc.

I have a large number of duplicates and wish to give and exchange them away.

If you cared let me hear any.

If you duplicate Reindeer, or any...
I am told that Eton is very healthy. But whether you have a visit I shall have great pleasure in sending some of my speeches, etc., if you can use it.

I was very sorry to have missed you in London. However, I hear that you were well taken care of.

With New Year's greetings,

Yours truly,

W. Boyd Dawler.

Prof. O. C. Marsh

The Owens College
Manchester
10 April 1900

Dear Prof. Marsh,

Could you kindly give me any information as to the identity of
Kings Nannerlin in Americiaother than the admirable summary in
your address?

I am to give 12 lectures at the
Lowell Institute in Boston in
Oct. & Nov. Next, after which
I shall like to call on you and
Study some of your wonderful hearts. I am so moved by these that I am driven to write this in an excess than.

Wishing you all good fortune in the summer Cambridge.

I am

Dean Prof. Marsh

Yours truly

W. B. and Darwin

Dear Mr. March,

Could you help me to a list of the Pleistocene mammals of U.S. and give me some reference as to the discovery of human remains in the Neanderthal age.

The evidence at my command as to the Calvarium, three, and the New Jersey interment (Alb.) seems some slight doubt. Can you give me a 'quietus' one way or another?
It is so.

I am to lecture at the Society Institute in order, and shall have to call on you and see the times before I return to Uncle at 11. My text is The Prominent Man.

I am much perplexed about W. S. Pliny the Elder. The town division judged by our evidence standard is Messina and according to Pliny the Kings story there is no important Plinius there. Before the W. Messina I. Pliny.
I am

Dear Prof. March

Dear Prof. Marsh,

Your very kind note has just reached me - I am very sorry that I cannot attend the meeting in New York, as I am obliged to meet Paleolithic Man at Princeton N.J. on the morning of the 17th and to spend a day with him.

There I am going to see the
coll. in Phila and thence in Washington, and on the 27th or 29th before to come to New Haven, in a week or two at the College, if that would not interfere with you there.

I am

Yours truly,

W. Boyd Santius

Prof. Marsh

Yale College.
Dear Mr. March,

I am very sorry that I am unable to accept your invitation to dinner. Kind intentions: at the moment I am engaged to go exploring around at Mount Auburn. Many times I have had enough. Then I am going to Philadelphia and Washington, and hope to get to New Haven by Sat. 27th Nov. in a week, and be at the...
Sir, P.O. Philadelphia

will be my address.

I am

Your truly,

W. Boyd Dawlin.

Prof. March.

Prof. March.
24 Nov. 1900

Dear Prof. Marsh,

I am on the way to Dr. Cook, New Brunswick, New Jersey, where I spend Saturday and Sunday, and I hope to get to New Haven Monday evening, so as to have three or four days at the bones and minerals.
Will you kindly tell me which is the title to which I am to address the letter? I cannot do it on a Saturday or Sunday - I find that are.

My correspondent has addressed a letter to me C/o you, or the chance of its reaching me. If it has come may I ask you to send it to New Brunswick, and to forgive me for troubling you?

- Deo P.F. Marsh

P.S. Marsh W. G. F. St. John
My dear Mark,

I was very pleased to hear from you and to read that you are well and Anne—

Since I landed here I have been spending double hours, as the wise writers say, but I feel "a wagon of horses with a little dung underneath."

I have hunted all the diagram
I saw Her Majesty the Queen at Rome, and you
write and send your greetings.

Can you bring the Plant as promised?

I hope to see you soon.

He came to France and
his family.

The original was done in Rome and
sent to the Emperor, and myself.

\( \text{Hypospadias patient} \)

It was mixed up with mine, and
then I came to have it.

My name is John and you will find
something about it in the Wissenschaft.

Jahreshefte — and I am sure that he
sent me it. It is one of Pienicius' names.

I think that it is the
same as yours.
So you saw the glauncils when
me in 'naive'. I feel bound no
longer to keep silence, and the
consensus of yew. Here is
that the glauncils deserve a thrashing
in the valuable of score. The cat had
to be killed, and I killed the cat.

The audaut, Dr. James Sclaii
daring to climb the little firm
clum dissent with while of the
Matar, hen is there, for the form of
new planted by a few families in
Scotland, not set marked geological,
has almost strick me dumb. Where
further the abbed his lie to the Pleistocene
Pleisine's heart's of emble, my keen could
no longer remain silent with honor. So
I renewed him, and got scratched.

My dear Marsh,

Since we parted I have been away to Carrara to report on the marble quarries, I have been unable to answer your letter until this evening. I thought that the debate of the British Assizes on Restoration, very useful & very stupid. I did my best to correct some of the blunders of the previous speakers as you know, as regards flesh, hair & colour. I certainly did not strike me that you were in the least degree hard on Osborne.
Profs. D.C. Quanah

W. Boyd Dawkins

Prof. D.C. Quanah

W. Boyd Dawkins

Not so hard as I should have been, had I the chance of going for Hutchinson, one of our popular scientific rat-catchers. Of course Seeley was wrong, he always takes elaborate pains to be so.

I hope you had a good passage; I enjoyed it as much as I did my time in Italy. The sunrises on the marble quarries of Carrara I shall never forget. It beats the sunrise on glaciers & snowfields.

Not shall I forget my scramble on mule-back over the ‘horizontal precipices’ of the Alpine region near Monte Risio; it almost
