Prof. Marsh.

Dear Sir,

Your letter came to hand two weeks ago being very at that time and until to day I could not send the books before.

I hope you will find them all right. I packed them the best I knew how. It is something I am not used to.
This lot are all from the same hill. If you remember when you was here before you got a piece of jaw and teeth which you called a "wetnoot" tooth. These are all from that place. All of them were found on the field after digging. They are from Sidney Melon hills as you will find them labeled.

You will have to work hard the next year as Rep Coke is working hard in this vicinity. He have heat on him so far coming out all that has been found.
