Lady Douglas Galton has received the announcement of the death of Professor Marsh from the President of Yale University with great regret.

Sir Douglas Galton had received a copy of Professor Marsh's work on "The Dinosaurs of North America" not long since, and he had the greatest admiration and respect for his work and for the Professor.
The President will regret to hear that Sir Douglas Galton himself passed away a few days before Professor March. He died on the 10th March 1899—grievously mourned and lamented.
