Scranton Pa June 18, 1874

Dear Martha

One of our Coal Co. has a fossil stomp taken out of one of their mines and also a slab about 3 feet long and about 2 feet wide. A Copse sedum or something of the kind which I think is better than any thing in the Yale Cabinet. I can see there or either of them if you want them in the Cabinet.

Can't you come up here sometime and take a look at us as we are pretty well fossilized if not in the horse chine. How about the thing Scranton sent you. Let me hear from you about this and when you want it.

Yours...
