Prof. C. G. Marsh

My dear sir,

When you was in Albany over a year ago you told me that you had geological maps of Europe, the use of which I might have for the purpose of coloring one from, for myself. I should like to color my map this winter and if you have a map of Europe of about fifty miles to the inch (English statute) that you could spare for a time I should take it as a great kindness if you would loan it to me. I have a small map of Central Europe belonging to Prof. Maynard (C. G.)
I say but it only embraces a small part of what I want. It is by Heinrich Bach and dated 1859.

A friend of mine, Capt. Dutton U.S. N. (who by the way I believe is an old classmate of yours) informed me that he believed you had lately published a Geological Map of the United States. I should like to know if it is true, and if so, on what scale is it drawn and where it can be obtained?

If you will be kind enough to give me information on the above subject you will greatly oblige.

Your truly,

Dear Sir,

I never gave you any definite statement in regard to the amount due. I only wrote you telling you I had them on hand and asked if I should send them on, and if you would like me to let Prof. D. S. Martin take off the work and go on with it.

The cards which I have now on hand are principally of New York, work and Billings of Canada. They cost me about eighty dollars besides my own work in marking the books laying on the work and examining.
the cards as well as some that I have written myself. Of many of the latter. If you like, I will call the whole matter one hundred dollars. If you will pay so I will send the cards on to you, or if you prefer to let Dr. Martin so on with it I will let him look at these to see what is to be done so he can understand it, and then send them to you afterwards. Please let me hear from you soon and other wise

Yours very truly
