Buckland, Let.
May 16, 1892.

Professor Marsh,

Dear Sir:—

When I came home from school Friday afternoon I was surprised to hear you had sent me a present of five dollars ($5.00) and I thank you very much for it. I hope the next time you come to see me I shall be here to see it.

I thank you again for the present and it will be well remembered when I ride my wheel. I hope you will

19306
come up to our home agin and hope I will
be here,
I'll all send best wishes.
Yours sincerely
Mabel E. Holcott
Professor Marsh,

Dear Sir,

I write, not to inform you of the discovery of a Dinosaur or any other animal, I am sorry to say, but rather to accept, at last, the invitation to come and see you which you have so often given me. If it does not interfere with your plane in any way mamma and I will come to New Haven next Wednesday, April eighth (5th)
just graduated.
Hoping soon to see you I remain;

Yours respectfully,
Mabel E. Wolcott
Cleveland, Ohio

If you will kindly let me know whether it will be convenient and agreeable for you to receive a visit from me, I will inform you at what time we will reach New Haven.

We are all well, papa has resumed his work in the quarry and I sincerely hope possible will soon appear, but see no sign as yet.

I am now a Junior in the High School, a class having
Professor March—

Dear Sir:

Your letter received this morning and in answer I will say that we will start for New-Haven at six thirty, Thursday morning reaching there at seven-fifty-five as you suggested. It will be very, very, pleasant to visit the Museum and Yale as you kindly mentioned. I am quite interested in Yale as two
If the boys from the S. Manchester High-school are to begin their college course there in September, hoping to see you settled at 755 Osborne.

Respectfully yours,

Albert C. Black

Professor March,

Dear Sir,

Every morning I take a trip to the quarry for the purpose of hunting fossils. Yesterday I found a bone stone with a white streak in it and I have sent it to you by the same mail as this letter. For the reason of knowing a fossil when I see it and will you let me know whether this is a bone or not so when I see another I will know it. I also found a large rock...
of distinguishing them from such other formations as the one sent to you.

The stone was found near a two-hundred-foot hill, matching the size of the one where the other bones were found, making this possibly a part of a dinosaur's remains.

Yours respectfully,

Mabel E. Robideau

Puckleland, Conn.
