Sir,

The Rev. E. R. Beadle

When in England kindly gave me your address as a geologist and requested me to inform you of an Ichthyosaurus Platypterus in the Stati and other fine fossils which I have on hand at present. The Ichthyosaurus is a very fine specimen being above six feet long, in case our barge is ready for exhibition.
Not the common species "communis," but platform which is muchrarer. It is also from a rare locality viz. Sanerton near Yeovil, Somersetshire. It is one of the best specimens I have had for years. The price would be 15s.

I have just been successful in procuring a fine selection of Permian fish. I have indeed a very good collection from nearly all the formations. Trilobites and Crinoids from the Silurian.

I have a large selection of

likewise a large series of Ammonites from the Carboniferous and other formations. If desirable I would have great pleasure in forwarding you a box of any of the above for re-selection or of any of the fossils I might possess at any time. I remain, Sir

Yours very obediently,

Bryce in bright.

Have am a very excellent
Series of the Woodwardius macrodactylus "from the lime Stone of Yorkshire & of the Eocenites Californiæ with Trent in the Stone from the Muschel Halk, Saxony."
January 22nd 1862

Addressee name

Bryce M. Wright,
Mineralogist, Geologist, and Conchologist.

Dear Sir,

I have the honour of acknowledging the receipt of your letter of the 15th, and must apologize for not answering before I have been however out of town and have only just returned. Referring to the Ichthyosaurus I think that Prof. Marsh would find it as good as the sketch formerly sent. There is one point I must mention as it is of course of importance viz. that since last writing I have discovered the species
The Icthyosaurus intermedius was not Platypod. The mistake occurred in consequence of a geologist from whom I purchased it having informed me of it being Platypod, and taking his word I did not examine it thoroughly but upon looking at it a few days afterwards I was sure there was some mistake to get Prof. Owen's assistant to send it with me the result being that it is intermedius. Should however Prof. Marsh still desire it I will send it forward upon hearing from you I will retain it anyhow until a

Answer arrives. At present I have not the material. Taaffe Marsh desires but I am in negotiation for purchasing a very fine collection and will send out with pleasure any that I might think would suit him. I have a very fine collection of 3rd Silurian Brachiosaurs which I could send a very fine collection. Afternoon, Sec.

Yours most obediently,

Bryce Mc. M. Wright
Edward S. Scranton & Co.

London, W.C. April 9th 1862.

Prof. C. L. Marsh,
Bryce M. Wright,
Mineralogist, Geologist, and Conchologist.

Dear Sir,

I have the Honour to acknowledge the receipt of your favour of the 21st March enclosed Draft to amount of 15£ in payment of the Ichthyosaurus for which I beg to return you many thanks. I trust that the Specimen ere this has arrived safely to hand and has given you satisfaction. I will let you immediately I procure a Pleis stoaurus.
I think that I can procure you some of the Vertebrates you desire especially from the Green Sand and will endeavour to make you a collection at once. I will forward in a day or two the following skeletons I will endeavour to procure you the Rhinoceros and others that you might desire.

Hyæa capensis

Vultur niloticus

Spur bill Crow (Grus Australia)

& Grpe.
I must apologise for not having answered before but I was in the Continent when your letter arrived. I have the honour Dear Sir, to Remain, Yours most Ob admly, Bryce in Wright
J. O. F. M. Marsh.

Mineralogist, Geologist, and Conchologist.

May 17th, 1872.

Sir,

I have the honour of informing you that I have this day forwarded as per enclosed list an assortment of fossils. Amongst them you will find a good collection of Inquonodon remains from the Greensand, as well as many very good teeth, etc. from various formations. At present I am sorry I have not any of the Diplodactyle remains, but will endeavour to procure a good series for you. I will
also look after getting a good Pleiosaurus and well write you immediately I have one likely to suit. I send in the Box a very perfect specimen of the Ichthyosaurus Common which I thought you might like to possess. At the present I have a very fine series of Crinoids and Scaphites from the Wenlock Limestone of Dudley and a most complete Collection of the Pear Cones winter 1947.

Omnus Parkinsonio) showing the various plates, shells etc. in every form. This series is valuable for teaching purposes and has been made at a great deal of trouble. I hope to hear of the safe arrival of the Box and that the contents will give you great satisfaction. Have the Honour of remaining Sir,

Yours most obediently,

Bryce M. Wright, Junior

90, GREAT RUSSELL STREET, BLOOMSBURY, London, w.c. Dec. 11th, 1872.

Prof. O. C. Marsh. Bryce M. Wright,
Mineralogist, Geologist and Conchologist.

Sir,

At last I have succeeded in procuring some Ostracodotype remains from the Green-Sand of Cambridge, also a portion of a large Plesiosaurus from the Seas of Lyme Regis, which I have forwarded to you
Today together with a selection of other fossils - of which the enclosed list contains. You will find 4 species of Dicynodon from New Zealand, also remains of teeth from Mauritius. There is also a very good series of Palaeotherium, Panotherium, Palaeomeryx, etc. from the Miocene of Hessen, Württemberg, and Longy, Dep. Allier.

The whole have been sent in two cases, & I have ordered them to be insured for full value.

I am Sir,

Yrs. obediently,

Bryce M. Wright, Esq.

Dear Sir,

I have the honour to acknowledge the receipt of your favoured of the 8th Jan., enclosing Draft for £3. 13. 6
in payment of last Yottles for which I beg to return many thanks.

I will do all I possibly can to procure you the Yottles you desire.
forward them as soon as possible. I am daily expecting to receive some mail. Mail remains outstanding. They are well kept there for you. With thanks I remain Sir.

Yours most obediently,

[Signature]

Date: [Handwritten date not legible]
Prof. O.C. Marsh,
Bryce M. Wright,
Mineralist, Geologist and Conchologist.

Dear Sir,

I herewith beg to send a sketch of a very fine Plesiosaurus, the dimensions of which are as follows:

- Length: 16 feet
- Width across fore paddles: 4 1/2 feet
- Width across the hind ones.

The price of this which I need scarcely say is a very fine one is 260 £. It belongs as in fact does all the Specimens here mentioned.
to a private gentleman who is disposing of his collection. There is a small one also which I could procure for £50 but nothing like the better specimen. He also possesses an extra-ordinary Elasmotheriosaurus
25 feet long. Seven feet across the fore paddles & 6 feet across the hind ones which I could procure for £250.

I have also just received a small Ichthyosaurus about 10 feet in length with jaw showing teeth, one anterior paddle very perfect, with ribs, tail, etc. the price is £15.
Dear Sir,

I beg to inform you of having forwarded today per Steavely the American European Express Three Cases Containing Fossils of which the enclosed is List. You will find amongst them a very good Specimen of Pterodactyle Remains which are extremely rare and very seldom to be met with from the Clays of Dorsetshire. I have also been
Fortunate enough to procure some teeth of the Pliosaurus grandis from the Hunmanby Clay of Ely Cambridge which are also forwarded. I procured these specimens out of an old collection & this is the first time I ever had them to face in my possession.

There is also a good series of fossils from the London Clay of Sheppy. Very few fossils Specimens of three of which have been described. I have sent some specimens also from the Thames valley deposits which you will find very interesting. The Plesiosaurian Remains, Ash ete from other strata you will find all good.

I will do my utmost to procure Ictiodactyl & other remains from the Upper Greensand of Cambridge. They are always however very scarce and are with great difficulty procured. I have not the slightest doubt however that I shall eventually get you a good series.

A week or two ago I had the pleasure of writing you about some Plesiosauri which are for sale. Hope to have the favour of your answer.

You may depend upon me.
Procurin[g] everythin[g] that I pos-
ibly can that you may desire.

Yours most obediently,

[Signature]

Bryce M. Wright, Mineralogist, Geologist and Conchologist.

Sir,

I have sent off to your address 2 clay 2 Cases containing fossils as per enclosed list. You will find a very fine head of various bones of the "Saurus spelaeus" lately found in the Pyrenees, also a No. of Vertebra of Mososaurus from Maastricht which is a
Sure fossil to procure.

There is also a good series
of \textit{Halitherium Schinzii},
from Honkei, Bred
remains from Lange,
& other good specimens from
I hope to hear they arrive
safely & prove satisfactory.

I am Sir,

Yours obediently,

Bryce M. Knight

Bryce M. Wright,
Mineralogist, Geologist and Conchologist.

Dear Sir,

I have the honour to acknowledge the receipt of your favour
enclosing draft to amount of 91£, for which I beg to return many thanks. I enclose receipt. I am sorry that some of the specimens were not of much use to you. I will however be cautious in future to forward solely those I am sure you may desire.
I have already a month ago forwarded you another box which I trust you have received ere this. Here are however no fishes in it but principally tertiary Bird Bones etc. I fear I shall not succeed in procuring if possible the Fish. Acetate remains factor of your desiderata. I will endeavour to have specimen you desire. With many thanks I have

With honour to remain Sir

Yours most obediently

Rya in writing

London, w.c.       July 17th. 1878

Prof. O. C. Marsh
Bryce M. Wright,
Mineralogist, Geologist and Conchologist.

Sir,

I take the liberty of asking you to examine closely the whole of the fossils from the London clay I have had the pleasure of forwarding you. As I have discovered in a specimen belonging to the same locality, a bird with reptilian teeth which Prof. Owen had just described as Protostega foliataeus of to a description
of which you will have a receipt. I should not be contented if you were to find and send me other remains of the bird on the specimen I sent you. I take the liberty of mentioning it to you.

I have the honour to remain,
Your most obediently,

[Signature]

Although I was aware the specimen was something out of the way, I was not certain it was part of a bird, so told it to the British Museum, who had
It thoroughly cleaned out with acid, etc.
