PAPILIONIDAE—(det. A. B. KLOTS)

37. *Papilio machaon aliaska* Scud.—Kukshu Cr., Haines H 118 YT, July 5 (MES); Polychrome Pass, McK. Park, July 20 (MES).

38. *Parnassius eversmanni thor* Hy. Edw.—Sable Pass, McK. Park, July 20 (MES)—3; a few others seen here, but not abundant.

HESPERIIDAE—(det. A. B. KLOTS)

In conclusion, we are all anxious to return for further collecting in this region. True, the roads leave much to be desired, and the continual cloudy weather or drizzle ("most unusual", according to some; "quite typical", according to others!) proved most aggravating. But the scenery, the plant and animal life, and the long daylight hours make this a wonderful vacation country—particularly for the bug-collecting entomologist!

This is a contribution from the Department of Entomology, University of Massachusetts.

Fernald Hall, University of Massachusetts, Amherst, Mass., U.S.A.

NOMINATIONS FOR SOCIETY OFFICERS FOR 1954

The Nominating Committee reports the following slate of nominees for officers of The Lepidopterists' Society for 1954:
