CORRIGENDA AND ADDENDA

Vol.13: no.3 — page 128: the list of mimics should have included the symbol for female [♀] after *Euryphene rubrocostata*, *E. wilwerthi*, *E. sophus sophus*, *E. congo-lensis*, *E. phranza phranza*, *E. letitia*, and the notation “♂ & ♀” after *E. cutteri* and *E. “sp. nov.?”*; all these are clearly shown by the color plates but were omitted from the list.

Same paper, page 145: the caption to Plate 8 shows *Iolais* as the genus of all the forms figured; in the text above, the new generic assignments from the Stempffer & Bennett revision are shown, and the plate caption should have had the same genera.

Vol.12: nos.3-4 — page 94: the dates for *Stallingsia*, *Turnerina* (misspelled “*Ter-nerina*”), and *Agathymus* should be 1959 (not “1958”), since FREEMAN’s paper was published 26 January 1959.

Vol.10: no.6 — page 207, text line 17: “SCHINDLER” should have been SCHILDER.
