COLLIER, A. B. COTTRELL, C. V. COVELL, JR., F. P. CRANSTON, C. J. DEMPWOLF, C. F. DOS PASSOS, P. R. EHRLICH, R. R. EHRLICH, N. W. GILLHAM, G. T. HELLMAN, J. H. HESSEL, S. A. HESSEL, G. W. KAMP, W. S. McALPINE, H. MARKS, L. S. MARKS, L. MAURTRER, N. S. OBRAZTSOV, K. W. PHILIP, D. J. PIRONE, C. L. REMINGTON, F. H. RINDGE, F. RUTKOWSKI, W. SIKORA, R. S. SIMMONS, G. A. TRIGAUX, J. P. WOURMS, M. ZAPPALORTI, J. B. ZIEGLER.

Respectfully submitted, PAUL R. EHRLICH, Secretary.

FOODPLANTS OF SPHINGIDÆ IN WISCONSIN

For the past twenty-five years I have been taking one or two specimens of *Sphinx kalmixæ* (J. E. Smith) each year at Hazelhurst, Wisconsin, but have not been able to locate its food plant. This summer I found two freshly hatched larvæ on *Diervilla lonicera*. These were brought to maturity and are now in the pupa stage. A few years ago I found a half grown larva of *Darapsa pholus* (Cramer) on Huckleberry and a larva of *Amphion nessus* (Cram.) on Fire Weed, *Epilobium angustifolium*. I have also raised several broods of *Sphinx gordius* (Cramer) on Alder, *Alnus incana*. I am not sure that these food plants are a matter of record but present them for comment.
