PIERIDÆ – PAPILIONIDÆ. By Mieczysław Krzywicki. 1962. 45 pp., 59 figs. Published by the Polish Entomological Society in the series *Klucze do Oznaczania Owadów Polski* (Keys for the Identification of Polish Insects), numbers 65-66, Warszawa 1962. [Available from "Ars Polona", Krakowskie Przedmiescie 7, Warszawa, Poland; price 10.-zl.] [In Polish.]

A further part of the Polish "Keys" contains a survey of these two families of butterflies. In the introduction the author gives a short report about each of these families. The keys for the identification go into details and inform us also about the life-history, distribution and variability. All species are figured, and for some of the similar species (*e. g.*, *Colias hyale* L. and *C. australis* Vty.) the genitalia and scales are figured also. In Poland are recorded 13 species of Pieridæ and 4 of Papilionidæ.

For the list of all preceding parts on Lepidoptera of the "Keys" for the identification of Polish Insects see in the *Journal Lepid. Soc.* 15: p.132; 1962.
