

## MANUSCRIPT REVIEWERS, 1999

The merit of a scientific journal depends on the quality of its reviewers as well as its authors, but the former are usually unknown to the readers of the published articles. The *Journal* relied on the expertise of 62 reviewers last year to provide 83 evaluations of manuscripts. It is with much gratitude that the *Journal* acknowledges the services of the people listed below, from whom manuscript reviews were received in 1999. Those who reviewed two or more manuscripts are denoted by asterisks.
