

### MANUSCRIPT REVIEWERS, 2000

The merit of a scientific journal depends on the quality of its reviewers as well as its authors, but the former are usually unknown to the readers of the published articles. The *Journal* relied on the expertise of 49 reviewers last year to provide 66 evaluations of manuscripts. It is with much gratitude that the *Journal* acknowledges the services of the people listed below, who reviewed manuscripts for the 1999 volume of the *Journal*. Those who reviewed two or more manuscripts are denoted by asterisks. Our thanks to all of you.
