Dear Sir:

Yours of Aug. 22<sup>nd</sup> has been received.

I have spirit specimens of *Hatteria* ranging from small ones to those of the largest size (about 22 in long).

I spent a week alone on a small rocky island inhabited by these lizards and secured a fine series.

My prices for spirit specimens and roughed out skeletons are from \$5.- to \$15.- each according to size.

Of *Onithorhynchus* and *Echidna* I have no specimens.

Yours Truly

C. F. Adams

P.S. I have two or three species of land turtles and a couple of species of (Monitor?) lizards which I collected in Borneo. These are skins for stuffing.

Dear Sir:

Yours of Aug. 31<sup>st</sup> has been received and I have sent you, by American Ex., three skeletons of *Hatteria*. One of them is the smallest I had and for the third one I sent a medium sized specimen having a much more nearly complete set of caudal vertebrae than is ordinary.

Hoping the selection will prove satisfactory, I am

Yours Truly

Prof. O. C. Marsh.  
New Haven, Conn.

Dear Sir:

The box with the *Hatteria* skeleton was received several days ago but the letter was only obtained today. I was away on a short trip when it first came but missed it after it had been forwarded from this place.

Thanks for the check <sup>of \$10.-</sup> which was the price of the two skeletons which you kept.

I am sorry you were disappointed in the size but those were the smallest I had roughed out.

Of other skeletons I have several interesting species of N. G. birds, and mammals and birds from Borneo.

I will send you a list soon.

Yours Very Truly  
C. F. Adams.
