I think that the
matter of Hayden & Co
going in indefinitely will
take care itself & all
their material will naturally
pass into the hands of their
successors, & any pressure
certainly not appropriate to
any thing except Hayden
& Co's special head.

Would it not be well to
make the Smithsonian as it
was the head of the
Biological Survey. (excl
Ralent.) sending it so that

Baird failing shd not
be named. Though I feel as
if there was too much to
do already at Smiths.
and that it's perhaps best
to leave that as matters
now stand as we had it.
We certainly could have a good
plan to have the Bishop pitch
him a lazer respondentia
in council but that seems
almost impossible unless
we organise it to the
extent plan the other
side will pick us every time
easy.

I shall look with
pleasure to the sundays you

when I am my last
we enjoyed it as much as
did.

Yours
affectionately.

My dear Mark

Your dispatch I found on my arrival, late last night, from Newport. Too late to reply. Your letter came to hand this A.M. mail only open 12-1 Sundays & not a chance to write by night mail. I go West on the 15th when I expect to have to be in N.Y. for a day or so. I am sorry to hear of the new complications in regard to land surveys & that comes up my impression must be to recommend that the land

Surveys be maintained as
an independent Bureau
(Land (under Interior) & charge
of a first class topographer
and I recommend that as cheap
a method of survey be adopted
as the lands call for. But
this involves it seems me the
necessity of having on the Com.
of the Acad. scientific thoroughly
conversant with the whole
system of Land Surveys. I
think Powell is and he
could be an excellent mentor
he has had great deal of
experience in Western Lands

My dear Marsh

I was very glad
to get good accounts from you
regarding your progress at
Washington. I missed Patterson
Lucas the other day who made a
flying visit to Peirce. Gibbs
has seen Peirce who's only
objection seems to be the loans
from the Int. Dept. fearing the
introduction of political element
in that quarter, thinking
Coast Survey safer in hands of Treas.

Hayden is at work and he

has been by making misrepresentations & not stating the whole The concluding I thank the ministers I have engaged my passage for Steamer if I do I leave N.Y.

My dear Marsh

Lyman telegraphed me almt having Fall meeting of Acad here. I cancelled for of Camt & Burton meeting and they seemed to think Camb. a very undesirable place of meeting. You may remember that when it met here another the meeting was not a success the Acad was not cordially minded and the whole was a stiff affair. I shall probably not be in Camb. when meeting occurs so I must be excused but if the Acad is to meet here the Camt. of Burton men should have a meeting and let us know who will act and take upon himself something. Every body seems very willing to have me do it but that I cant do as I do not intend to be again mentioned as I was when the Acad was here last. Let me know how matters stand

Affy, Yours,

My dear Mark

We were all rather disputed at the elections of the Acad. Practically 3 new Washington members a large percentage & with the elections at Wash^n the evil with your name each year and the Acad^y will soon end in being a Wash^n clique They have no absolute power over us can always be on hand & checkmate them and I for one don't think the game is worth the hustle. Hence I expect to be consulted Lenafter as I have pretty well concluded to draw out of every thing which is not absolutely essential and not directly under my nose.

Winthrop tells me You had appointed me on the Newport local Com^e for the Fall meeting as I shall not be in Newport then you will have to appoint some one else in my place

My dear Maria

I got your despatch
and replied. It is no use
to count on me for any
thing. I must simply
say no to any thing
and every thing for
some time to come. It
is more than I can carry
to attend to my own
affairs without
attempting to run
Washington; besides

This specialty I don't believe in & after the manner as usually taken by Lawyers & don't prepare & Law any more chatters in their matters apt myself mistaken in first pics. This the more as I perhaps not pay Designs for Academy I should do it at Oct. Meeting when this a proper meeting to do so.

My dear Mark

I have yours of the 6th and of course after such a letter as that I can do nothing except to withdraw my various resignations so that if you have not taken any action abt. them please put them in the fire and say nothing abt them. Hall might as well keep the book of Mr. Lut. as there is not likely to be much of any thing to add at present as he can send it back Exp.° to me. I will write him to that effect - I am very desirous to be there "meeting as my Supt. is to be there at that time to consult abt. various matters. I think I can arrange so as to run Minot up while in N.Y. or New Haven and we can make up some kind of working plan - I should be very glad to see any Japs just as I am enrolment for the Exp. cage.

it might develop the dream again. I saw
a lot of Japs. at Sandhurst Xmas. who came there
as labourers it was as good as seeing a bit of
Japan. Some of the nominations to Academy struck
one as pretty poor — Heidi of putting up such
a scientific chap as Carey! it passes comprehension —

I ought never to have withdrawn the resignation & never sent as membership to Albany; I meant many things I have given up much more to me than that I am constantly giving up, others & self denial I must resist again. I cannot remain a member any thing in which I do not take an active part. I do this

debt heartily! I am acting as counsel
about 2 days per week and I follow this

My dear Mark.

It's no use for me to think for a moment of remaining in the Acad. Each year I lose ground and dimin myself that I can go back and begin anew. I must not commit that mistake again & must clear myself of everything not of the first importance to me. I don't yet know what I shall do. I rather think it

will be a night train - I expect to get Home

My dear Marsh

On my return from the West I find your note of the 5th. while fully reciprocating the kindness of the members of the Acad. in asking me to remain on the list of Hon. Members I feel that I must abide by my first request. I do not believe in any thing but an active membership of the Acad. for me or nothing. There is no prospect of the former & I cannot go and must pin upon my age as fast as

possible and as I have mapped
in to be from other things which to me
are for nearer and shake recipe from
others also I see nothing except to
make a clean sweep and retire
as fast as practicable to my own private
life.

My dear Marsh
of H.C.
The President tells me you
are to be doctored at the 250th
anniv. I write to ask if you
will not come and stay
with me on the occasion
the ceremonies begin early
Monday A.M. The 8th and I
shall be glad to have you
either Saturday or Sunday hope
as you find it most convenient.

I see the Natl. Acad is
to have a special meeting
when it meets here. I hope
that my resignation will be
acted upon. I must insist
on withdrawing my [illegible]
the Acad. The whole tendency
of it becomes more and more
of a Wall St. concern and I
cannot risk myself
upon what the
Wall St gentlemen I have
to consult upon for my
personal comfort and safety

my experience at Wall
St did not prepare
me to have anything to do
there either directly or indirectly
and expose myself again to
such treatment as I have
served for daring to have
opinions of my own which
are not [illegible] & the person
that be. I do not feel able
to discuss a subject with people
whose only weapon is abuse
and personalities & throw
myself in their path in

any way I can help you

Sincerely

A. Yassin
