

Schenkari N.Y. July 29/86

Sir

I have a very nice collection of fossils & wishing to leave this place very soon will sell it at a very great sacrifice

It is composed of different series the Collins limestone Schenkarie N.Y. to Hamilton the top - My collection from the Collins Limestone is the best in existence contains many new species - The Tentaculites Finstonia - Pentamerus - Delthyris Shell - Encrinural - Upper Pentamerus limestone, a good one from Austerly - Schenkarie N.Y. & Onondaga Limestone &

Hamilton Period fare.

It contains about 2500
Specimens & about 400 different
Species -

If you wish to buy you will probably
never have a chance like this again
& it will worth your attention for
its value to you & the very low figure
it will be sold at - I can refer
you to good authority that have
seen it & to its merits should
be pleased to have some of your
representatives see it -

If not desirable id inclly
give me the name of some
institution that may -

Hoping to hear from you soon
Yours Very Resp -
Frank L. Becker
