

Columbia College
in the City of New York

Garrison-on-Hudson, N.Y. Dec. 17. 1894.

Professor O.C. Marsh
Yale University

Dear Sir;

I forward ^{by express} the paper by Dr. Dolley and me within the time limit you kindly allowed. It was ready and type-written when presented before the meeting of the National Academy of Sciences at Albany more than a year go., but I wished to have the figures redrawn, and understood that the paper would not be required until the end of the year. The drawings are not now done as well as I should like, but I cannot get them done better at present.

Prof. Barker, Dr. Weir Mitchell Dr. Billings and other members of the Academy advised me to submit the paper for publication in the memoirs, owing to the fact that the apparatus was secured through an appropriation from the Bache Fund and is the property of the Academy.

I much regret that Prof. Penfield was unable to accept a place on the editorial committee of SCIENCE. In other respects the arrangements for the journal are progressing favorably. The first number of the new series, ~~is~~ to be issued on Jan. 4th., will contain introductions by Prof. Newcomb and Pres. Gilman and articles by Prof. Mendenhall, Dr. Goode and others. I wish it were possible to have your name also ^{represented} in the first number, but I can

understand how very fully your time must be occupied.

With full appreciation of your courtesy,

Very Truly Yours,

J. McR. Cattell

I forward the paper by Dr. Doherty and me within the time limit you kindly allowed. It was ready and type-written when presented before the meeting of the National Academy of Sciences at Albany more than a year ago, but I wished to have the figures redrawn, and understood that the paper would not be required until the end of the year. The drawings are not now done as well as I should like but I cannot get them done better at present. Prof. Barker, Dr. Weir Mitchell, Dr. Pillsbury and other members of the Academy advised me to submit the paper for publication in the memoirs, owing to the fact that the apparatus was secured through an appropriation from the Bache Fund and is the property of the Academy. I much regret that Prof. Penfield was unable to accept a place on the editorial committee of SCIENCE in other respects the arrangements for the journal are progressing favorably. The first number of the new series is to be issued on Jan. 4th. will contain introductions by Prof. Huxford and Prof. Gilman and articles by Prof. Mendelhall, Dr. Goode and others. I wish it were possible to have your name also in the first number, but I can
