

3198
Washington D. C.

March 3rd 1884

My Dear Professor Brewster

I have not met

you personally for a long
time, but I know you have
been personally cognizant
of me and my work, also
that a select committee of
the U. S. have unannouncedly
endorsed it. Also that on
the floor of the House of
Representatives this report
has been declared as being
"not appreciable to science."

I do not wish anything which

-3132-

I feel nervous & unable, but
you know Callin and the
character of his work as he
knows you your work. I will
give an illustration. — Suppose
your official superior had
said that those bones you
have discovered were mutilated
all those of woolled breeds
but buffaloes and you had
confidently appealed to a
jury of of paleontologists
& had been unanimously
endorsed by them, & yet you
had been dismissed for being
in the right, how would you
have felt? I am exactly

in that fix, and I only
hope that every body who
purports a claim to charlatanism
will be on my side in this
matter. If you can show
that in any of my statements
I am not scientific, go for
me, but your course, and
I do hope you will stand
by me and help me to the
winning.

Sincerely yours

Peter Collier

Prof. O. C. Marsh,

New Haven, Conn.

My Dear Professor:- I send you a parcel containing something dug up on our farm, and should be glad if you would tell me what it is.

Sincerely yours,

Peter Collier
