Camp Sheridan, W. Dak.
Sept 23 1879,

Dear Professor,

I have just returned from
a trip to the "Bad Lands" of
Dakota, while out I collected
quite a number of fossils, I
think among them I have the
bones of a new animal, I
collected quite a number of
the bones I found in our place
& have them boxed up for you
& brought to this Post. I discovered
the bones about 150 miles N. E.
of here on a branch of Sage Cr.

a tributary of the Chyenne
 River, but we know if you
 would like to have them and
 how I shall send them. My
 Cowie probably go to the
 R.R. my son & I will take
 them down with us as far as the
 R.R. when they can be shipped
 by you my family.

Take you as well & happy
 I remain

Yours very truly

Dear Professor.

Your note of the 30th
left reached me safely also
copy of your address at Leaverton.
I am much obliged.

The box will be shipped to
you for Friday the 25th of Oct. It will leave
here on the 19th.

All the bones contained in the
box I picked up in one place
and belong to the same animal.
I could not find any good
teeth or jaw bones. You will
see that he is a very old fellow.
When the box will arrive
perhaps other you may be
able to discern something

new & interesting.

I am going down in the
Running water south of here
in a day or so hunting with
I find any thing in the shape
of fossils will send them to
you.

Your very truly

Dear Professor,

I have seen Judge
Whitcomb about the Canal,
under the law you are only
entitled to the cases. The judge
said he would write the full
particulars in regard to it
which I suppose he has done
before this. The only way that
I can see for you to get it
would be to have some friend
East take it up in his name
copy and transfer it on
to you. I will hold you
resp & cheer until I hear
from you again.
Yours truly
P. H. R.
