Dr Curtis,

Washington

Dear Sir

Yours of 5th inst
came to hand today - I have
received some packages of
Tobacco seed for which I
must thank you - also
for Agricultural Report -

I will give the Tobacco
seed a trial but think we
have too short a season

I am obliged for your kind
offer of ~~of~~ grape vines but am
of the opinion that they would
do no good here - I should it
be convenient next year for

5199 3578
you to send me any seed
of any kind of bulbous veg
etables I would be glad to
try them as all kinds of
roots flourish & mature here
to a wonderful extent -

It would be too late for
them this year however

Any letters or packages
arriving here for "Beaver
Dick" will always be de-
livered to him

I should I find it in my
power at any time to give
you any information or
if I could serve you in any
other way I would be glad
to do so -

"Barnack Jem" (a trapper)

3579
has left with me a very
rare zoological specimen which
he would be glad to sell as
a curiosity to any lover of
such articles - It is the head
of a white tail buck - perfect
in every respect - has two
well developed horns in the
usual place - and then it
has a third horn 6 1/2 in-
ches long just between the other
two - The skull & horns are
in perfect fix - that is the
bones are - the hair & meat
has been torn off the lower
jaw - This third horn is gen
uine - it points to the front
and is a straight spine

Yours &c
