Professor Marsh

Dear Sir

Been somewhat
interested in scientific
subjects generally, (and
indeed pardon me when
I say that I make
an effort to lecture
sometimes on its various
branches)

at present I am employ-
-ed on evolution and
more particularly the
horse

I hope you will not con-
sider me impertinent or
ignorant of your val-

valuable time by ask-
ing you a few questions
with reference to that
animal,

Having read professor
Huxley's evidence of
evolution, he refers to
you having a number of
specimens at Yale College
the horse *si* in the
Tertiary Strata,
has there been any further
discoveries made recently,
if so where can I obtain them
or was the original horse
larger or ~~smaller~~ smaller than
the present one

I will consider myself
under an obligation to you
by answering these my
humble requests. Yours Truly,
Joseph Dunning
