

Farnham, Que., Feb. 2 1885-

Prof. Marsh

Dear Sir

I send you today, some fragments of a glacial worn boulder containing fossils. I presume they are of no particular value save as curiosities, yet, if not encroaching too much upon your valuable time, I would like to have them classified, for since my brother, Mr M. P. Felch of Canon City, Colo., has been engaged in his present occupation, I have become greatly interested in Geology, and am trying to arrange a small cabinet.

Hoping to receive a reply,

I remain,

Very respectfully yours

C. E. Felch.
