Dear Sir,

I have today shipped a box of minerals to the Rev Thomas Condon, Sallis City, Oregon, as per your order. The minerals were picked out by Mr Beuison and were what I should have sold generally for fifty dollars in gold. I am anxious to encourage the sale of minerals to Educational institutions and willingly make considerable discount to them.

Very respectfully,

Henry G. Hanks.

Prof O. C. Marsh,

Dear Sir,

Your letter of March 10th enclosing check for fifty dollars came to hand a day or two ago. Mr Senison will pick out the specimens and the box will be forwarded to Mr Rev Thos Conden in a few days.

I have communicated your message to Mr Senison.

The person who brought the specimens of Surungite from Mexico has returned to that Country and is of the opinion that he will be able to find a quantity of it. He will also send me a quantity of Shearston. If any thing new turns up in your line I will notify you.

Very Respectfully,

Dear Sir,

Your letter of March 2^d
is at hand. The fossils are on their way
from New York to San Francisco via
Cape Horn. I have written to Mr Davis
asking him the lowest price he will take
for them. I have no interest whatever in
them, as soon as I receive his answer I
will write you again.

Would you like a cat-
alogue of the Pacific Coast minerals at
the Paris Exposition? I have a few copies
left, one of which I will send you if it
will be of interest.

Very truly
