

House of Representatives U. S.,

Washington, D. C.,

February 4, 1884.

, 188

Professor O. C. Marsh,

President National Academy of Sciences, New Haven Conn.

My dear Sir:

It has been suggested that a sum of money be placed at the disposition of the National Academy of Sciences for prosecuting the investigation as to the feasibility of making sugar from sorghum at a cost to enable it to compete with foreign grown sugars. It seems to me that this investigation should be made and I should be glad to be informed how much money you think ought to be appropriated for this purpose. Your early reply will oblige

Very truly yours

Alvare S. Hurlburt

# THE WESTERN UNION TELEGRAPH COMPANY.

## ALL MESSAGES TAKEN BY THIS COMPANY ARE SUBJECT TO THE FOLLOWING TERMS:

To guard against mistakes or delays, the sender of a message should order it REPEATED; that is, telegraphed back to the originating office for comparison. For this, one half the regular rate is charged in addition. It is agreed between the sender of the following message and this Company, that said Company shall not be liable for mistakes or delays in the transmission or delivery, or for non-delivery, of any UNREPEATED message, whether happening by negligence of its servants or otherwise, beyond the amount received for sending the same; nor for mistakes, or delays in the transmission or delivery, or for non-delivery, of any REPEATED message beyond fifty times the sum received for sending the same, unless specially insured, nor in any case for delays arising from unavoidable interruption in the working of its lines, or for errors in cipher or obscure messages. And this Company, is hereby made the agent of the sender, without liability, to forward any message over the lines of any other Company when necessary to reach its destination.

Correctness in the transmission of message to any point on the lines of this Company can be INSURED by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding 1,000 miles, and two per cent. for any greater distance. No employee of the Company, is authorized to vary the foregoing.

No responsibility regarding messages attaches to this Company until the same are presented and accepted at one of its transmitting offices; and if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the agent of the sender.

Messages will be delivered free within the established free delivery limits of the terminal office—for delivery at a greater distance, a special charge will be made to cover the cost of such delivery.

The company will not be liable for damages in any case where the claim is not presented in writing, within sixty days after sending the message.

THOS. T. ECKERT, General Manager.

NORVIN GREEN, President.

Receiver's No.	Time Filed.	Check.

Send the following message, subject to the  
above terms, which are hereby agreed to.

New Haven Feb 5, 1882. 4

To Hon. A. S. Kellogg,

Washington D.C.

Yours letter received. Will answer  
as soon as I can consult  
with Council of National  
Academy of Sciences

O. C. Marsh

Paid

Mr Hewitt is now  
in New York - will  
return late Monday  
evening. C H Ridewood  
u.d. Clerk A.S.H.

House of Representatives U. S.,

Washington, D. C., May 3rd, 1886.

Prof. O. C. Marsh

Yale College, New Haven, Conn.

My dear Professor:

After I have read the bill of Mr. Herbert I shall be able to judge whether he proposes to destroy any legitimate progeny of the system of which you are good enough to say I am the father. There is such a thing as abusing the law. I do not say that it has been done, but I know very great prejudice has been created in the minds of members of Congress by the character and cost of the publications produced by the Geological Survey. All that I ever aimed at was to secure such a survey as we have had in New Jersey with a good geological and topographical map of the United States. I never contemplated the establishment of a scientific publication department for original research. It seems to me the attempt has been too ambitious, and like pride has o'er leapt itself. Nevertheless, I will do what I can to prevent injury to that portion of the work which is really valuable and productive.

Sincerely yours,

Frank S. Harkness
