

TELEGRAPH STATION.
MALTON 6 MILES.

CASTLE HOWARD.

YORK.

Sep. 7. 1890.

Dear Professor Marsh

I see from
the Times that you are
at Leeds ; and I wonder
whether you would
care to come over here
on Thursday & see this
place. A large number
of the British Assn

members are coming,
a lady Carlile asks
me to say she hopes
you may be able to
come with them and
to stay the night here: there are no prehistoric
monsters, or great bones
here, but the house
& ground are fine
and there is a splendid
collection of pictures. I
have a very vivid recol-
lection of your kindness
to Mapeth and myself
at Yale, and I hope
you will let me have
the pleasure of showing
you what there is
here in return.
I am sorry Mapeth
isn't here: he is still

in far countries , as he
went on to Australia
from San Francisco .

We had a glorious time
in the West , and a
most delightful climb
in the Yosemite with
old Mr Clark , who is
a veritable patriarch
of the mountains .

Yours sincerely
Lily Jones .
