

1622 Locust St.

Mar 7 '1868

My dear Prof. Booth

It gives me great
pleasure to make you
acquainted with Prof
Marsh of New Haven.

You will find him
an intelligent Mineralogist
& Naturalist. He is anx-
ious to see the collection
of Coins & other matters in
the Mint & I am

1856
he will appreciate
any service you can
render him.

I am very truly
yours &c
Dana Lee

Prof. Booth.

My dear Prof. Brewster

I am glad to be able
to send you the photograph
of my friend the late Prof.
Vanuxem which I procured
from his family for you -

It was taken from a Daguerre.

I hope that you got
home safely & that all goes
on well with you & my

4
11228
friends in New Haven -

We are getting on
as usual at the Academy

Always very truly
Yours,
J. S. Maclean

Prof. Marsh.

My Dear Prof. Marsh,

I have your note with
the "Black Opal" for which I thank
you. I shall give it a good
examination & will write to you
again. I wish to make some
comparisons, but am pressed
at this moment for time.

Very Truly

Yours &c

Wm. Lea

Prof. Marsh

Oct. 18 / 75

My dear Prof. Marsh,

My nephew Frank Chambers has entered at your college, & I give him this introduction to you, begging the favour that you would render him any service in your power, while he may remain in New Haven.

You will find him every way worthy of your friendship & I hope he will leave

11331
your great school with
credit to himself, as well
as to his instructors —

I hope you will
always come to see me
when you visit our
city —

Permit me to
congratulate you on
the great success of your
recent explorations —

I see what you have
published in the Am. J. Sci.
& Pro. A. N. S. The field
you have worked up so
well has produced a

11332
most abundant harvest.

Very truly
yours

Francis De

Prof O. S. Marsh.

July 28 1847

Dear Prof. Marsh,

Your beautiful ^{Vol} was
sent from Philadelphia to me
here where I spend four mo^s
of the year. I would have
acknowledged its receipt sooner,
but that I wished to look over
it carefully, & tell you how much
pleas^{ure} I have been with it.

I have looked at every paper
which you have published in the Ann.
It with great interest for years, & am
delighted with the present Volume.

11234
What a rich & copious mine
you are working! There seems to be
no end to the richest harvest. What
a stone you have gathered for the
Museum of Yale College! How much
I should be pleased to see the
diversities of the Abontosaurus beds.

What wonderful Ovontornis
you have discovered, & the number of
specimens too is astonishing! You must
have revelled in the beds. The Hesperosaurus regalis, is truly wonderful,
& you have the skeleton so complete.
What a curious world must have
existed at the time when the S. Victor
in such numbers appeared!

11235
Those gigantic reptiles of the Ju-
rassic Formation, the Sauropoda, are
most particularly interesting. I hope
you will give them in another
vol. although I can scarcely
expect to see it, being in my 90th
year.

Let me again thank you
for the pleasure I have had
in reading your vol. I sincerely
hope you will ~~you~~ continue to work,
as you have begun, in these impor-
tant remains of an ~~important~~ an-
cient world. What a field you
have before you, & I wish you a
long life to cultivate it!

Believe me Truly yours
Obliged Friend
Prof. O. C. Marsh

Dear Prof. Marsh.

I duly received your
Dinocosta. What a splendid
volume you have produced!

The subject is a grand one
& you have added much to it
the literature. It will last
as long as science shall be
cultivated.

I compliment you
on the matter as well as the
manner.
