

Browns Dallas Co Alabama

June 27/1884

Dear Sir

The U.S. Geological Surveying Department had a gentleman in this neighborhood a year or two since hunting up petrified & fossil bones. If I recollect right his name was Lawrence Johnson, and thinking your Department might want some of such bones, I write to say that a lot of ~~such~~ them have been washed up by a late freshet, and if you wish them I could have them gathered and shipped to you for a very small expense, they are within a mile of this place, the bones are very large

Yours Respectfully

A. P. Leiser

To The Director of  
The U.S. Geological Survey }
