Prof. Marsh

Dear Sir

I have collected some "specimens" of the coal period which I am anxious to send to the Yale cabinet. Please inform me as to the "modus operandi". I have succeeded in obtaining some beautiful impressions of ferns and will soon obtain many more and intend to devote a day to that object. I would be much pleased with any instructions or remarks you would be kind enough to give in connection with this subject. Accept Sir, the best wishes of your friend

and pupil
