

Vienna Dec: 7th:
1847.

My dear Sir!

Allow me to offer you my best thanks for the copy of your Address: "Introduction and Succession of Vertebrate Life in America," you have been pleased to favour me with. It ~~has~~ opened may, as it were, a new world of highly interesting facts; America is really an inexhaustible store-house of wonders to the Palaeontologist.

As an humble requital of this valuable present, I took the liberty of transmitting to you a copy of my "Nomenclator Zoologicus," of living & extinct Genera by way of M. Braumüller & Son, Booksellers. A few days ago, I wrote a concise Abstract of your Address, to be published in our Geological Institute's "Proceedings," I hope you are not displeased at it.

Receive again my warmest thanks & believe me,

Dear Sir

for ever Yours most truly

Coant Marschall

Corr. Member Philad. Acad. Nat. Sc.

Professor B. C. Marsh Esq: &c
