

Meadow Springs Farm
Colorado Feby 1st 1870

Professor O. S. Marsh
Yale College

Dr Sir

I enclose you
a petrification which was picked
up on the hills west of our house
and at about seven hundred feet
greater altitude. We are quite cu-
-rious to know what kind of tooth
it is and would be much obliged
for the information. The photograph
of your camp and the copy of
the "Courant" which your kindness
provided were received with pleasure.

The family join me in hoping
you will call on your next visit
to Colorado

Your friend
Mrs J. S. Maynard
