

Limerick June 26, 1867.

Prof. Marsh:

Sir.

Your letter of the 21, came duly to hand: and in reply, would say; that the fossil remains of *Megatherium*, etc., of which you inquire; were found in Maldonado, (which is about 30 leagues E. of the Capital of Uruguay S. B.) about the time that the Southern Rebellion broke out in the United States.

My friend Señor Luis Paviazzi is director of the Museum in Montevideo, and would be a very good person to write to relative to the objects which you desire. — Does not understand a word of English, you would have to address him in Italian, Spanish, or French. The Buenos Aires Museum, has in my opinion the finest collection of that kind in the world, but the government will not knowingly permit them to leave the Country.

I forbid the starting of No 33 & 34 for less than \$25 each & No 163 for less than \$50

1540
they are also from S. A. & as you well know
they cost much more than these three
several sums. - Will not your college purchase
them at the above figures? if so please inform
me & I will forward by express C. O. D. Are
not Nos 572 & 573 of sufficient interest to induce
you to purchase them? and also Nos 565 x 566 x
567 x 568 x 569 + 570 x 571 or any of them?

Many thanks for your kind offer.

Respectfully,
W. W. Morgan
