

Middletown N. J. Jan 15<sup>th</sup> 1870

Prof. O. C. Marsh

D<sup>r</sup> Sir

I have been informed that you recently visited this County. I very much regret that you were unable to call upon me so that I might acknowledge your kindness in sending me the catalogues &c. & also give you a tooth and vertebra which I have been keeping some time with the intention of sending to you. If you judge from the rough sketches over leaf that they are worth your securing, please direct me how to send them to you. My time has been so much occupied during the last fall & present winter that

I have not been able to make  
any extensive visit among the  
owners of marl-pits. Among  
my immediate acquaintances  
that I frequently see I have  
not heard of any discoveries  
of the kind you wish.

The sketches are of the actual  
size of the bones —

The hatched parts of the vertebra  
are where the original surface  
has been broken off

Your obt. servt  
George F. Murray
