Prof O. C. Marshes Sir knowing
you to be interested in specimens of
Archaeology I have taken the liberty
to write to you in regard to that subject
I have in my collection ^{of American Antiquities} an impression
of a Mochasin foot in solid sand
stone it was first found on a pier
of a bridge where it had been for 50
years. The other impression was found
in the Susquehanna River. I have
then photographed it and will send you
one if you give the proper directions
where to send it.
Box 400 J. Murray Nesbit.
