Dear Sir

Having been engaged by the South Dakota Commissioners to make an exhibit at the Columbian worlds fair. Showing the fossils of this state. I am very much in need of the government works on Paleontology especially those works covering the investigations of Prof Marsh in the Bad Lands of this state I think it is the 10th Vol of the Geological reports. There also may be other reports covering the ground of which I am not familiar. Any assistance you may give me will be duly appreciated. And I wish to extend to you a cordial welcome to over South Dakota building should you be in Chicago during the Worlds fair.

Yours Truly G. W. Pettigrew
