## UNITED STATES NATIONAL MUSEUM

UNDER DIRECTION OF

THE SMITHSONIAN INSTITUTION

WASHINGTON

Dec 30-95

Prof. O. C. Marsh

My Dear Sir:

In the Smithsonian Half-Century book there is to be published a list of the types (original and supplementary) belonging to the U. S. Geological Survey and this Museum. The collection sent by you appears to contain one type Triceratops elatus. Will you please indicate on the enclosed card the formation, place of publication, page and figure. Also please furnish me with as complete a list as you can of all types in your possession belonging to either the Survey or the National Museum. I hope your list will be a long one. The Department of Paleontology will make a good showing and I feel that fossil vertebrates will be one of the conspicuous divisions. Wishing you a Happy New Year, I am  
Yours Truly  
Charles Schuchert.
