New Haven 2nd Nov. 1876

Professor Marsh

Dear Sir

The bearer, C.W. Borup,
has been introduced to me as worthy of
of all confidence and respect.

He has executed some busts &c for
Major Fitch and brother; Gov. Winches-
ter and others; and is entirely out of orders
and employment.

He is under the impression
that in having casts made of some of
your fossils, he can do the work of much
more durable material (of which he
will explain) and much better than my
one you can employ him.

If you can give him any employment
I think you will be aiding a very worthy
gentleman.

Yours very truly
Dr. Sheffield
