

Rutgers College, New Brunswick
(Oct 1869)

Mr C. C. March

Dear Sir

Your letter was duly received and the perusal of it somewhat surprised me, for I was not aware that you had one of my fossils, until I read your letter. — However you may keep the specimen as a gift from me, as my attention is given more to the collecting of minerals, than fossils. —

Our New Jersey Marl beds
abound, more or less in great
quantities of fossil. &c.
and if you wish at any
time to search for some
specimens, I will be happy
to entertain you at my
father's house. During
vacation of course only.
Or else if I should find
anything of value to you
I will exchange it for
Minerals that I have not
got.

Very Truly Yours
D. Dabois Smock.
