Dear Sir:-

Your letter of the 5th to hand. These books were in the possession of a Japanese Priest, and are a little Compendium or Encyclopaedia of Japanese knowledge.

They were not bought with any intention of selling them. It would be difficult to fix a price on each one. The lot was originally valued at one thousand (1000) Yen, but they have got to be sold, and if you can use the lot of three hundred and seventeen volumes, you can have them for \$250.00, or if you prefer to select the volumes you can select any fifty volumes for \$100.00. Some of the books are extremely rare.

Hoping this will be satisfactory, we remain,

Respectfully yours,

L. Wertheimer

Dear Sir

If you come again to N. Y. I hope you will be able to make it convenient to give me a call. I have some very valuable Books in French, German, etc on Japan & China from the 18th & 17th century: among others Kaempfer's Description, original subscription one of the rarest books out (2 volumes) The Memoires of the Abbe de T. on Japan from the 17th century, a compendium of the Jesuits & now in trendy rare & others. I feel certain you will be interested & will not lose your time

Very Respectfully

Louis Wertheimer

Professor O. C. Marsh Yale College

Dear Sir

I have been away for a few days & must therefore apologize for the apparent rudeness in not answering at once your esteemed letter.

I must have some notes somewhere on this subject taken in my travels, and I believe I have also a few unwritten ones left in my head, but for the moment I could not lay my hands on the former & it is difficult for me to put my thoughts into succinct shape. The fact is that this is our busiest month, what our business "haymaking time" when one is so occupied with the petty cares of business as to make us

can't to properly attend to anything
 else. It is now about 20 years ago
 since I travelled through these
 regions where I received hundreds
 of new impressions daily & I
 must really wait for a time
 when I will have a little more
 repose in order to recollect them
 properly & accurately. I can tell
 you that they were made by
 hand (no machinery). It was done
 on the rivers edge & I know not
 that water played a great part
 in making them. In a few weeks
 I will be able to go over some
 of my notes & then I will be
 very pleased to give you further
 data about them.

Mr. Lawrence had the balls from
 us, but please do not mention this
 to him, as it is rather a breach
 of business etiquette for me to say
 so.

We have none of the triangular
 prisms left. We have still a
 number of the balls including some

which I think would be interesting
 from your point i.e. from a
 scientific point of view. But
 this of course is merely a
 guess on my part. We are
 not selling very many now &
 if there should happen be a large
 sale I will inform you so
 that you could go over them
 & pick out those you desire.

I have not seen marble balls
 in China, but I have seen what
 looked to me like similar material
 to this spotted material made
 up into slabs, figures etc.

I am very sorry that I can
 only give you such meagre in-
 formation at present & will try
 to do better next time

I remain

Yours Very Truly

Louis W. Shinn

Professor D. C. Marsh,
Yale University,
New Haven, Conn.

Dear Mr. Marsh:-

Your letter of Dec. 10th to hand. I am very sorry, but am unable to tell you anything more for the present than I have told you. I am busy from eight (8) in the morning until six (6) in the afternoon with hardly a moment to spare. It is impossible, under the circumstances, to get one's ideas together properly. After Christmas I will try and get my recollections in shape to see whether I can be of any use to you.

Yours truly,

Louis Wertheimer
